---

**Executive Summary:**

The Citation Latitude has become one of the most successful midsize business jets in the world, combining a spacious flat-floor cabin, advanced Garmin G5000 avionics, strong operating efficiency, and reliable performance. Introduced in 2015 as the successor to the Sovereign+, the Latitude quickly gained popularity among both private owners and fractional operators like NetJets, which now operates a substantial portion of the global fleet. The aircraft offers impressive passenger comfort, generous baggage capacity, and a practical 2,600 nautical mile range, making it a compelling option among business jets for sale. However, buyers considering Hawaii operations or extended over-water missions should carefully evaluate the Latitude's operational limitations and consult with a private jet broker or private jet expert to ensure the aircraft aligns with their mission profile.

**Key Takeaways:**

- The Citation Latitude offers a spacious 6-foot stand-up flat-floor cabin, advanced Garmin G5000 avionics, and strong operational efficiency, making it a leading option among midsize private jets for sale.
- NetJets' large investment in the Citation Latitude reinforces the aircraft's reliability, parts availability, and long-term market support, which benefits owners evaluating business jets for sale.
- The marketplace generally favors non-NetJets Latitudes equipped with larger IPECO seats, which may positively influence future resale value.
- While the Citation Latitude performs exceptionally well for most missions, buyers planning frequent Hawaii or extended over-water flights should carefully consider its operational and non-ETOPS limitations.

**FAQ:**

***What makes the Citation Latitude popular among private jet buyers?***

The Citation Latitude is popular because it combines a spacious flat-floor cabin, low cabin altitude, advanced Garmin G5000 avionics, efficient performance, and comfortable seating in a midsize business jet platform.

***How does the Citation Latitude compare to the Sovereign+?***

The Citation Latitude replaced the Sovereign+ by offering a more modern flat-floor cabin design while retaining many proven features such as similar wing design, avionics, fuel capacity, and engine configuration.

***Why are non-NetJets Citation Latitudes often more desirable on the resale market?***

Non-NetJets Citation Latitudes are generally preferred because they were delivered with larger IPECO seats, which provide greater passenger comfort and may support stronger long-term resale value.

***Can the Citation Latitude fly to Hawaii?***

The Citation Latitude can operate to Hawaii under certain conditions, particularly under Part 91 operations, but its non-ETOPS limitations, oxygen capacity, and emergency planning considerations make it less ideal for frequent Hawaii missions.

***How can a private jet broker help when buying a Citation Latitude?***

A private jet broker or private jet expert can help buyers evaluate seating configurations, maintenance history, operational limitations, resale trends, and mission suitability when considering how to buy a private jet like the Citation Latitude.
